Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the applications:

Listing of Claims:

1. An anti-drift improvement for an adjustable wrench having a movable jaw with a rack

gear driven by a worm gear, the improvement comprising: a bore into a body of the wrench

body parallel to a shaft of the worm gear shaft with a chordal portion overlapping the threads

teeth of the said gear, said threads teeth having an array of notches extending parallel to said

bore, a pin reciprocally slidable in said bore when said bore is aligned with one of said arrays of

notches whereby, when an inserted, said pin cooperates with said bore and one of said array of

notches to prevent rotation of said worm gear.
